

R E M A R K S

Claims 1-31 currently remain in the application. Claims 2-20 are herein amended and claims 21-31 are newly added claims.

The present application is based on a PTC application filed originally in Japanese. A translation thereof is being filed simultaneously herewith. Since the originally filed application includes dependent claims dependent from a multiply dependent claim, the claims section has been herein rewritten in an amended form without any such dependent claims depending from more than one other claim.

The title of the application as used in the earlier filed PTC application has also been canceled herein and substituted with a new title -- LIQUID CRYSTAL FLOW FORMING MECHANISM, METHOD OF FORMING SAME, AND OBJECT MOVING MECHANISM USING LIQUID CRYSTAL FLOW--.

Respectfully submitted,

Keiichi Nishimura
